Osteoid

Invivo One

Redefining the dental imaging landscape

Decades of experience come together to deliver the most advanced 3D dental imaging suite.

As a pioneer in 3D dental imaging, Osteoid's Invivo products have been at the leading edge of dental technology for more than a decade. Invivo One, the latest release from Osteoid, is changing the way you buy, use and manage your dental software.

Features

Complete solution in one simple plan
Managing, purchasing, and administration of multiple point solutions can be costly and time consuming. With the release of Invivo One, a single plan will give you access to Invivo Workspace, Invivo Desktop and addon products like 3D Analysis, Medical Design Studio and Stitching.

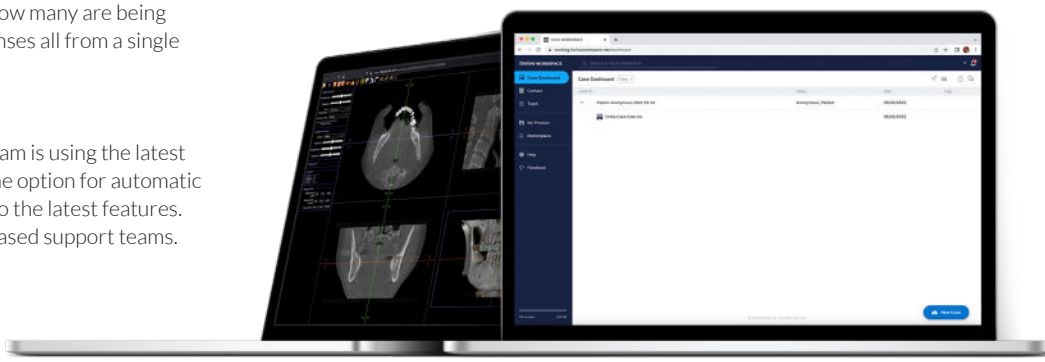

More flexibility
With Invivo One's new licensing system, installing and accessing your software on multiple devices is a breeze. Cumbersome license transfers are a thing of the past. You can even install a mix of PC and MAC versions of the desktop software on as many devices as you'd like as long as you only use one at a time.

Advanced administrative controls
Invivo One takes the headache out of managing multiple licenses at multiple sites by giving IT teams or site administrators visibility into how many licenses of each software product are available and how many are being used. Administrators can also assign and remove licenses all from a single panel.

Automatic updates and built in support
You'll no longer have to worry about whether your team is using the latest version of the Invivo software. Invivo One includes the option for automatic or on-demand updates, so you'll always have access to the latest features. Invivo One plans also include access to our live, US-based support teams.

Built for the future
Built on a completely new architecture, Invivo One will be the backbone of our future technology. We are actively building new features that will expand on our cloud computing expertise and even introduce artificial intelligence and machine learning. As these features are released, they will all be available through Invivo One.

Fully connected
Creating the most connected experience for customers has been central to our product vision and is visible in the connectivity between Invivo Workspace and Invivo. We've strengthened this integration and will be bringing even deeper connections to improve 3D imaging workflows.
